National Treasury issued municipal investment regulations on 1 April 2005 (Gazette No. 27431) which sets out a framework within which all municipalities must conduct their cash management and investments.

An obligation rests with the Accounting Officer to ensure that cash resources are managed as effectively, efficiently and economically as possible. Competitive investment and effective cash management ensures both short term and long term viability and sustainability of the municipality.

This policy is consistent with both the Act and the gazetted framework.

3. ADOPTION

The Council must formally adopt an investment policy which shall be consistent with the Act and its regulations.

All investments made by the Municipality, or by an Investment Manager on behalf of the Municipality, must be in accordance with this policy, and with any investment regulations promulgated by national government.

The effective date of this policy shall be the date of its adoption by Council.

4. PURPOSE

The purpose of this policy is to secure the sound and sustainable management of the Municipality's surplus cash and investments.

5. SCOPE AND APPLICATION

The policy governs the investment of money not immediately required by the Municipality for the defrayment of expenditure.

The policy applies to all new and existing investments made by:

- the Municipality; and
- all Investment Managers acting on behalf of the Municipality in making or managing investments.

The policy does not apply to trust money administered by the Municipality where the trust deed prescribes how the trust money is to be invested.

The Board of Directors of all Municipal Entities must adopt this policy. Further, the same Municipal Entities must submit reports, as detailed in the Reporting and Monitoring Procedures, in the same manner as the Municipality, to the Executive Mayor.

6. OBJECTIVES OF THE POLICY

The objectives of the policy are:

- (a) to ensure compliance with the relevant legal and statutory requirements relating to cash management and investments;
- (b) to ensure the preservation and safety of the Municipality's investments;
- (c) to ensure the diversification of the Municipality's investment portfolio across acceptable investees, permitted types of investments and investment maturities;
- (d) to ensure that the liquidity requirements of the Municipality are properly addressed;
- (e) to ensure the highest return on investment at minimum risk, within the parameters of authorized instruments as per the Act; and
- (f) to ensure timeous reporting of the investment portfolio as required by the Act in accordance with Generally Recognised Accounting Practice.

7. INVESTMENT ETHICS

7.1 Investments made by or on behalf of the Municipality:

- (a) must be made whilst maintaining a strict code of ethics and standards;
- (b) must be genuine investments and not an investment made for speculation;
- (c) must be made with primary regard to the security of the investment, secondly to the liquidity of the Municipality and, lastly, to the return on the investment;
- (d) must be made without internal or external interference, whether such interference comes from individual officials, councilors, agents, investees or any external body.

7.2 Fees, commission, other rewards or gifts

- (a) No fee, commission or other reward may be paid to a councilor or official of the Municipality, or to a spouse or close family member of such councilor or official, in respect of any investment made by the Municipality. This shall be confirmed annually by all investees to the Auditor General;
- (b) No councilor or official of the Municipality may accept any gift from an investee or its agent, unless that gift can be deemed so small that it would not have an influence on his / her relationship with the said institution. Such gifts must be dealt with in accordance with Council's Gifts and Benefits Policy.

7.3 Risk Management

The preservation and safety of investments is the foremost objective of the investment policy. To attain this objective, diversification is required to ensure that the Municipal Manager or his / her delegatee prudently manages risk exposure. Risk profiles should be minimized by only placing investments with institutions and instruments approved by the Public

Investment Commission or the National Minister of Finance of the Republic of South Africa.

7.4 Prudence

Investments shall be made with care, skill, prudence and diligence. The approach must be that which a prudent person, acting in a like capacity and familiar with investment matters, would use in the investment of funds of like character and with like aims, to safeguard the principal and maintain the liquidity needs of the Municipality. Investment officials are required to:

Due to the high bank charges with regard to cheque payments, it is essential to limit the payment of creditors to one payment per creditor per month. Should the facility be available, payments should be done by electronic transfer (subject to strict controls).

When considering the time to pay a creditor, proper consideration must be given to the conditions of credit terms of payment offered, i.e:

- In cases where a cash discount is given for early settlement, the discount, if the relevant time scale is taken into account, must in most

cases be more than any investment benefit that could be received from temporarily investing the funds;

- If discounts are offered for early settlement they must be properly considered and utilized;
- Besides this, the normal conditions of credit terms of payment offered by suppliers must also be considered and utilized to the full by paying on the due date and not earlier, provided that no worthwhile discount is available or offered.
