- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

2.3 SCOPE OF WORK

PROVISION OF PROFESSIONAL STRUCTURAL ENGINEERING CONSULTANCY SERVICES: KWT TRAFFIC STONE BUILDING

It is the intention of the Buffalo City Metropolitan Municipality to appoint a Professional Service Provider (PSP) who will carry out the professional consultancy services described hereunder. This Terms of Reference and the PSP's submission will form the basis of the Agreement.

BACKGROUND

A historical stone building currently stands in the Traffic Department compound in King Williams Town (Corner of Edward and St James Street)

It seems that the stone building originally served as a stable for horses. The walls of the building are constructed of natural stone, with a galvanized corrugated metal roof. The building is double storey with a suspended concrete floor.

Unfortunately, due to the lack of reinforcing and the composition of materials used, the suspended concrete floor is structurally inadequate to support the loading requirements of a general office space – As per structural assessment conducted in 2013.

PROJECT DESCRIPTION

Buffalo City Metropolitan Municipality intends to rehabilitate the 'stone building' and convert it into offices.

Critical to converting the building would be to ensure that the building is structurally safe and that the existing suspended concrete floor slab can support the required loading of offices.

To achieve that above, a Structural Engineer would need to ascertain the areas of structural concern and provide design solutions (drawings and specifications) in order to make the building safe and habitable to be used as offices.

Further to providing design solutions, the Structural Engineer may be required to provide basic cost estimates, and to oversee the construction and implementation of the proposed design solutions and provide certification of the work.

ROLE OF THE BIDDER

Bid submissions are requested from competent Professional Service Providers (Structural Engineers) to undertake the necessary work as described above.

In this document the Bidder is required to submit a Bid Price ('Estimated Number of Hours' multiplied by the tendered 'Hourly Fee Rate') for the performance of these professional services.

SUMMARY OF SERVICES REQUIRED

In summary, the PSP is required to:

- Identify structural challenges in converting the existing stone building into offices.
- Provide structural engineering design solutions to overcome the structural limitations of the building.
- Provide an estimated cost for the proposed structural rehabilitation of the building.
- Oversee the construction and implementation of the structural design solutions.
- Provide a close-out report and engineering certificate.

DELIVERABLE TIME-FRAMES

The appointed Engineer will be granted Six (6) weeks to complete all investigations and provide BCMM with the necessary structural designs and specifications required to implement the engineering work.

Once the designs and specifications have been completed, and sufficient budget exists, the Engineer will be requested to proceed with costing the engineering works.

Should sufficient budget remain, the Engineer will be requested to oversee the implementation of the work once a tender for the engineering work has been awarded to a contractor.

LOCATION OF THE PROJECT

The project is situated at:

King Williams Town Traffic Department, Corner of Edward and St James Street,
